

Radyne ComStream, Inc.

O F F I C E

SAN DIEGO • CALIFORNIA

Located on Sequence Drive in San Diego, California, this facility was developed for Radyne ComStream in the Sorrento Business Park. This project is one of three facilities developed in the master-planned development.

Radyne ComStream designs, manufactures and markets satellite Internet-infrastructure equipment; satellite broadband modems; multicasting receivers; and converters for digital TV, data and

telephone service. The company has offices throughout the U.S. and internationally; the San Diego location is one of its corporate offices (along with its Phoenix location), and serves as a manufacturing facility as well. Features of the facility include glass curtain walls in the front office, a distribution area and a laboratory.

SIZE: 200,000 square feet; two 2-story buildings
